

TIMILEHIN ORIPELOYE

Design Engineer · Bridging High-Fidelity Product Design + Performant Frontend Engineering

Lagos, Nigeria | timilehinoripeleye@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Design Engineer with 5+ years of experience operating at the intersection of product design and production-grade frontend engineering. Specializes in design systems architecture, interaction design, and performant frontend delivery across React, Next.js, React Native, and TypeScript. Consistently bridges the gap between pixel-perfect design vision and scalable, maintainable code — building with product goals in mind and shipping with production quality as the standard.

CORE SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3 / SASS
Frameworks: React.js, Next.js, React Native, Vue.js, Vite, Node.js
Design & UI: Design Systems, Figma, Component Libraries, Interaction Design, Accessibility (WCAG), Tailwind CSS, Framer Motion, Radix UI
State Mgmt: Redux Toolkit, Zustand, React Query, Context API, XState
Tooling & CI: Webpack, Storybook, Chromatic, Jest, Turborepo, Fastlane, GitHub Actions, Cross-Platform Architecture

PROFESSIONAL EXPERIENCE

CredBevy

Sep 2022 – Present

Senior Design Engineer

Leading the bridge between product design and engineering, owning high-fidelity frontend delivery and design system architecture across admin dashboards and mobile products.

- Introduced React Query + Zustand state boundaries, eliminating redundant renders and reducing Time to Interactive (TTI) to under 1.8s.
- Built virtualized data grids with react-window to render 10k+ rows without blocking the main thread.
- Launched an A/B testing layer using Context API and remote config, accelerating UX experimentation cycles.
- Configured GitHub Actions pipelines with Lighthouse performance budgets and automated security checks on every PR.
- Mentored engineers on advanced React and React Native patterns while raising code review standards across the team.

Plearnty (Sterling Bank Subsidiary)

Aug 2024 – Aug 2025

Design Engineer

Designed and built the interactive web experience for a gamified educational platform that rewards users as they learn.

- Engineered a high-performance quiz interface with fast feedback loops and polished transitions using Framer Motion.
- Collaborated with product stakeholders to translate gamification concepts into a scalable, accessible, high-fidelity UI.
- Integrated real-time reward mechanics, ensuring state consistency and a seamless cross-session user experience.

Business in My Pocket (BiMP)

Jul 2023 – Jul 2024

Design Engineer — Design Systems Lead

Architected a unified React design system to bridge design vision and production code for a real estate marketplace.

- Built a headless component library with Radix UI, delivering accessible, keyboard-first interactions across the platform.
- Documented components in Storybook and added Chromatic visual regression tests to prevent unintentional UI drift.

- Mapped Tailwind design tokens directly to Figma variables, tightening design-to-code consistency and reducing handoff friction.
- Guided full migration from legacy custom CSS to the design system, reducing feature delivery time by 30%.

Total IT Stores

Sep 2023 – Dec 2023

Design Engineer

Crafted high-performance e-commerce and booking experiences with a focus on polished interactions using Next.js.

- Delivered SEO-optimised storefronts with minimal client payloads and significantly faster page load times.
- Implemented reliable client-side state management for advanced product filters and dynamic catalog search.
- Improved checkout reliability through rigorous input validation and comprehensive edge-case handling.

Davino Group of Companies

Jul 2022 – Dec 2022

Lead Design Engineer

Directed frontend strategy and UX implementation for corporate platforms across three international markets (Nigeria, Kenya, Guinea).

- Integrated headless CMS platforms (Sanity and Contentful) to enable non-technical teams to publish content independently.
- Delivered cross-browser interfaces with asset optimisation tuned for lower-bandwidth network conditions.
- Adopted modular CSS architecture patterns that scaled cleanly across multiple regional product variants.

TeenPay Africa

Sep 2021 – Sep 2022

Founding Design Engineer

Established the design-to-code foundation for a cross-platform fintech product, ensuring high-fidelity delivery across web and mobile.

- Configured a Turborepo monorepo with shared types and schemas across web and mobile clients, reducing duplication significantly.
- Designed smooth React Native Reanimated animation flows maintaining consistent 60fps interactions on both iOS and Android.
- Implemented real-time account linking with WebSockets and Server-Sent Events for live transaction sync.
- Automated App Store and Google Play release pipelines with Fastlane, cutting manual release overhead.

XXOL Care

Aug 2021 – Mar 2022

Design Engineer

Led UX modernisation and performance overhaul, migrating a legacy SPA to a polished Next.js experience.

- Modelled multi-step booking flows in XState, eliminating unpredictable and inconsistent interface states.
- Applied edge caching, dynamic imports, and next/image optimisation to reduce Largest Contentful Paint (LCP) by over 50%.
- Migrated styling to a utility-first Tailwind setup, improving team velocity and UI consistency across the codebase.

EDUCATION

University of Lagos (UNILAG)

2015 – 2020

B.Eng, Mechanical Engineering
